Notes on this operating instructions

- Please read the operating instructions carefully before using the product for the first time. This will help you to familiarize yourself with the product more quickly and avoid operating errors that could lead to damage or accidents. In particular, follow the safety instructions and hazard warnings.
- Keep the operating instructions and pass them on when selling or passing on the product.
- The current version of these operating instructions can be downloaded from our website www.prophete.de.

General safety instructions

RISK OF SHORT CIRCUIT, FIRE AND EXPLOSION!

- The product contains a battery. The product must therefore never be thrown into a fire, immersed in liquids, short-circuited, exposed to high temperatures or extremely low air pressure.
- If you notice smoke, unusual noises, odors or heat, stop using the product. Do not use it if it is obviously defective or damaged.
- Only use the original battery supplied with this product or batteries of the same type.

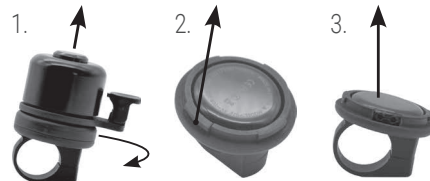

- If you suspect that a child or pet may have swallowed a battery, seek medical attention immediately. If swallowed, it can cause severe internal burns or death within 2 hours.
- Do not modify the product in any way.
- This product can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.

Product function

The smart tag integrated in the Smart Doorbell can be used to determine the current position at any time via the Find My app / Find My network. This product can only be used with an iPhone.

Quick Instructions

Removing the Smart Tag

1. Turn the bell head **02** and pull it off the bell holder **04**. The Smart Tag is now visible.
2. Pull off the wedge **03** on the bell holder **04**.
3. Remove the Smart Tag **05**.
4. Insert the Smart Tag opener into the recesses provided and pull it carefully around the Smart Tag until the cover comes off.
5. Remove the protective film from the battery.

Pairing the Smart Tag

1. Reinsert the battery. Pay attention to the correct polarity (+/-). After inserting the battery, you will hear a beep and the Smart Tag can be paired within 10 minutes. After this time, the pairing mode is terminated and the battery may need to be reinserted.
2. Put the cover back on the Smart Tag and place it near your Apple product.
3. Open the *Find My* app.
4. Select *Add object* in the app and then *Add other object*.
5. Pair the Smart Tag by tapping *Connect* in the app.
6. Select a unique name & emoji for your Smart Tag.
7. Confirm the process so that the Smart Tag can be assigned to your AppleID.

Enable lost mode

1. Open the *Find My* app and click on the Smart Tag on the device page
2. Go to *Lost Mode + Activate*.
3. Follow the instructions in the app
4. Finally click on *activate* to start the lost mode.

Unpairing the smart tag

1. Open the *Find My* app and click on the smart tag on the device page.
2. Select *Remove object* and confirm the removal of the Smart Tag again.

The Smart Tag can be paired again within 10 minutes. After this time, the pairing mode is terminated and the battery may need to be reinserted to restart the mode.

Enable the SN number to be read

1. Place the Smart Tag on a flat surface and turn it over after 5 seconds.
2. Turn the Smart Tag over again after a further 5 seconds. Repeat the process twice until the Smart Tag emits an acoustic signal. The serial number can now be read out.

Factory reset

If the Smart Tag is to be paired with a new AppleID or if it was not in the vicinity of the Apple product when it was disconnected, the Smart Tag may need to be reset to the factory settings.

1. Reinsert the battery 5 times in succession.

Technical data

MODEL	Smart bell
BATTERY	CR 2032 (3V)
COMPATIBILITY	iPhone-Model (iOS Version 10 or higher)
DIMENSIONS	66 x 57 x 40 mm

Warranty information

We grant the statutory warranty period for this item. This begins from the date of purchase (receipt, proof of purchase). During the warranty period, defective products can be reported to the seller or to the specified service address. During this period, we will rectify all defects attributable to material or functional faults free of charge. This does not include normal wear and tear or damage caused by accidents, improper use, dropping/impacting or modifications to the product. No new warranty period begins with the repair or replacement of the item.

Disposal

Disposing of packaging

The packaging material is partially recyclable. Dispose of the packaging in an environmentally friendly manner and take it to your local recycling center.

Disposing of the Smart Tag

Consumers are legally obliged to dispose of electrical and electronic appliances separately from household waste at the end of their service life.

This ensures that they are recycled in a way that protects the environment and conserves resources. You can hand them in at the collection points of the public waste disposal authorities or at the collection points set up by the manufacturers or distributors in accordance with the ElektroG. The disposal of old appliances is free of charge. Consumers have the option of returning an old appliance free of charge to a distributor obliged to take it back if they purchase an equivalent new appliance with essentially the same function.

Batteries and accumulators that are not firmly enclosed in the electrical or electronic equipment and can be removed without destroying them must be separated from the equipment before handing it in at a collection point and disposed of in a designated disposal facility.

EC Declaration of Conformity

You can find the EC Declaration of Conformity for this product on our homepage at www.prophete.de.
